Professional Experience

2022-11 - 2023-01

Freelance Web Developer

Moka Bar Cafe

- Developed and implemented a cutting-edge website for Moka Bar using NextJS technology
- Enhanced user experience with fast server-side rendering and seamless navigation between pages
- Provided customers with comprehensive information on the cafe, including menu options, through a user-friendly interface
- Designed the website to not only be functional but also visually appealing, ensuring accessibility for all users.

2022-06 - 2022-08

Freelance Web Developer

Gotya Plumbing Solutions

- Successfully created a user-friendly website for Gotya Plumbing using ReactJS technology
- The website serves as a one-stop source for all plumbing services, client reviews, and contact information for the business based in Queensland
- Streamlined information presentation, providing clients with a clean and easy-to-understand overview of the business
- Improved user experience with a single-page layout and intuitive navigation, making it effortless for customers to find what they need
- Contributed to the professional image of the business with a well-designed, visually appealing website.
